THE GAZETTE SIAT VIOVAL RICEUTAT TO SUAY 13. A LOCOMOTO'S STROCK BY LIGHTNING On Fuday last, staring the hall storm that visfied this section, the eastward bound train on the Toleda, Paoris and Warsaw railway, Geo. Boies conductor, and C. A. Martin engineer, had just left El Paso as the storm struck it. athe lightning struck the telegraph pole. Insecond of shattering it and going to the ground,
it burst the insulator making a plaze of light,
passed on the wise to the next insulator and
burst that, with another blaze of light, as intense, a looker on informs us, as a thousand
has jets, and so on for five poles. It then tan
down one pole and leaped to the track, and ran
back without doing any damage until it struck

the engine. It ran up one of the drivers and buist exection of two feet out of the solid tire, buist exection of two feet out of the solid tire, but passing along the boiler, without doing any damage. A reached the lever and went upwards with a blaze of light similar to that on the telegraph wire, and with a defonation like a small cappann. So interse was the light, and so violentwas the shock that the engineer was nearly blood and almost stronged. Our informant blinded and almost stunged. Our informant street and ou the wires was brilliant beyond conception. All looked as if there was an immense dake of fite shead, into which the train was spent to plonge, and the contrast between the fight and the ordinary daylight that followed, spented as great as that between the brightest day and the darkest night. — Peoria Transcript.
